Registrations task

Objective:

Create a registration and login page. Ensure all required fields (name, email, and password) are validated using PHP.

Requirements:

1. **Registration Page (register.php):**
   o Create a form with the following fields:
     ▪ Name (text input, required)
     ▪ Email (email input, required)
     ▪ Password (password input, required)
     ▪ Confirm Password (password input, required)
   o Implement PHP validation to ensure:
     ▪ All fields are filled out.
     ▪ The email is in a valid format.
     ▪ Passwords match and meet any specified criteria (e.g., minimum length).
   o Upon successful registration, store the user information in a database .

2. **Login Page (login.php):**
   o Create a form with the following fields:
     ▪ Email (email input, required)
     ▪ Password (password input, required)
   o Implement PHP validation to ensure:
     ▪ Both fields are filled out.
     ▪ The email is in a valid format.
     ▪ The password is correct by checking against the stored data in the database.
